**Middle-Childhood:**

- **Developmental Milestones in Middle Childhood**
  Middle childhood is both a stage and a pathway to future development.

- **Middle Childhood: Your Child’s First Step towards Independence**
  Middle childhood begins at the age of six and ends at the age of eleven, or that period of development prior to early adolescence.

- **Middle Childhood (6-8 years of age)**
  Developmental Milestones
  Middle childhood brings many changes in a child’s life.

**Adolescent:**

- **Young Adult Development Project**
  Created to capture the powerful new research findings that are emerging about young adulthood and to make these insights more accessible to those who need them, including colleges and universities, employers, parents, human service providers, and young adults themselves.

- **Adolescence**
  Researchers have generated more complex understandings of youth.

- **Adolescent Stages of Development**
  Adolescence: The Last Step Before Becoming An Adult
  This is a time for adolescents to decide about their future line of work and think about starting their own families in a few years.
